In addition, since the GST regime has been recently implemented, the impact, if any, that implementation of the GST regime will have on our tax liability and other related matters is uncertain. SUMMARY OF OUR INDUSTRY OVERVIEW

The information in this section includes extracts from publicly available information, data and statistics and has been derived from various government publications and other industry sources. Neither we nor any other person connected with this Issue have verified this information. The data may have been re-classified by us for the purposes of presentation. GLOBAL ECONOMIC OUTLOOK

The global economy is experiencing a cyclical recovery, reflecting a rebound in investment, manufacturing activity, and trade. This improvement comes against the backdrop of benign global financing conditions, generally accommodative policies, rising confidence, and firming commodity prices. Global GDP growth is estimated to have picked up from 2.4 percent in 2016 to 3 percent in 2017, above the June forecast of 2.7 percent. The upturn is broad based, with growth increasing in more than half of the world's economies. In particular, the rebound in global investment growth—which accounted for three quarters of the acceleration in global GDP growth from 2016 to 2017—was supported by favorable financing costs, rising profits, and improved business sentiment across both advanced economies and emerging market and developing economies (EMDEs). This synchronous, investment-led recovery is providing a substantial boost to global exports and imports in the near term.

In advanced economies, growth in 2017 is estimated to have rebounded to 2.3 percent, driven by a pickup in capital spending, a turnaround in inventories, and strengthening external demand. While growth accelerated in all major economies, the improvement was markedly stronger than expected in the Euro Area.

Growth among EMDEs is estimated to have accelerated to 4.3 percent in 2017, reflecting firming activity in commodity exporters and continued solid growth in commodity importers. Most EMDE regions benefited from a recovery in exports. The improvement in economic activity among commodity exporters took place as key economies—such as Brazil and the Russian Federation—emerged from recession, prices of most commodities rose, confidence improved, the drag from earlier policy tightening diminished, and investment growth bottomed out after a prolonged period of weakness. Nonetheless, the estimated pace of growth in commodity exporters in 2017, at 1.8 percent, was still subdued and not enough to improve average per capita incomes, which continued to stagnate after two consecutive years of contraction.

RECENT DEVELOPMENT IN SOUTH ASIA

In South Asia, growth slowed to a still strong 6.5 percent in 2017, below the June forecast, in part reflecting adjustment in India to the new Goods and Services Tax and the adverse impact of natural disasters across the region. Growth is expected to stabilize around 7 percent a year over 2018-2020, with private consumption remaining strong and investment recovered by infrastructure projects and reforms. Main risks to the outlook include setbacks in reviving investment, fiscal slippages, and disruptions to activity resulting from natural disasters.

In India, growth slowed for the fifth consecutive quarter to 5.7 percent (year-on-year) in the first quarter of FY 2017/18 (April-June 2017), partly reflecting adjustments by businesses to the prospective introduction of the GST in July 2017. In addition, protracted balance sheet weaknesses— in particular, a corporate debt overhang and elevated non-performing loans in the banking sector—continued to weigh on already weak private investment (World Bank 2017y). Weak private investment was only partly mitigated by a public infrastructure investment push and a surge in current expenditures after recent public pay hikes. In the second quarter of FY2017/18 (July-September 2017), the slowdown in economic activity bottomed out by a still weak 6.3 percent (year-on-year) growth. The manufacturing Purchasing Managers' Index (PMI) and industrial production growth remained broadly expansionary after they temporarily weakened as producers reduced inventories amid uncertainty relating to the implementation of the GST. Despite a recent uptick, inflation remained within the Reserve Bank of India's (RBI) target band of 2-6 percent, following a steady decline over the past year to 1.3 percent in July amid weak food prices. Fiscal consolidation has continued in the central government, but sub national fiscal deficits have risen, partly

reflecting debt payments taken over through Ujwal Discom Assurance Yojana (UDAY) and a broader shift in public expenditures from central to state governments, and recent public pay hikes.

INDIAN ECONOMY- OVERVIEW:

Introduction

India has emerged as the fastest growing major economy in the world as per the Central Statistics Organisation (CSO) and International Monetary Fund (IMF) and it is expected to be one of the top three economic powers of the world over the next 10-15 years, backed by its strong democracy and partnerships. India's GDP increased 7.1 per cent in 2016-17 and is expected to reach a growth rate of 7 per cent by September 2018. India, a South Asian nation, is the seventh-largest country by area, the second-most populous country with over 1.33 billion people, and the most populous democracy in the world. India boasts of an immensely rich cultural heritage including numerous languages, traditions and people. The country holds its uniqueness in its diversity and hence has adapted itself to international changes with poise and comfort. While the economy has welcomed international companies to invest in it with open arms since liberalisation in 1990s, Indians have been prudent and pro-active in adopting global approach and skills. Indian villagers proudly take up farming, advanced agriculture and unique handicrafts as their profession on one hand while modern industries and professional services sectors are coming up in a big way on the other.

Government Initiatives

India's unemployment rate has declined to 4.8 per cent in February 2017 compared to 9.5 per cent in August 2016, as a result of the Government's increased focus towards rural jobs and the Mahatma Gandhi National Rural Employment Guarantee Act (MGNREGA) scheme. The Government of Maharashtra has set a target to double farm income by 2022 through measures like large scale micro irrigation, water conservation, expansion of formal cash credit coverage, crop insurance and agriculture diversification, as per Mr. Vidyasagar Rao, Governor of Maharashtra. Numerous foreign companies are setting up their facilities in India on account of various government initiatives like Make in India and Digital India. Government of India has launched the Make in India initiative with an aim to boost the manufacturing sector of Indian economy, to increase the purchasing power of an average Indian consumer, which would further boost demand, and hence spur development, in addition to benefiting investors. The Government of India, under the Make in India initiative, is trying to give boost to the contribution made by the manufacturing sector and aims to take it up to 25 per cent of the GDP from the current 17 per cent. Besides, the Government has also come up with Digital India initiative, which focuses on three core components: creation of digital infrastructure, delivering services digitally and to increase the digital literacy.

Road Ahead

India's gross domestic product (GDP) is expected to reach US\$ 6 trillion by FY27 and achieve upper-middle income status on the back of digitisation, globalisation, favourable demographics, and reforms.

India is also focusing on renewable sources to generate energy. It is planning to achieve 40 per cent of its energy from non-fossil sources by 2030 which is currently 30 per cent and also have plans to increase its renewable energy capacity from 57 GW to 175 GW by 2022.

India is expected to be the third largest consumer economy as its consumption may triple to US\$ 4 trillion by 2025, owing to shift in consumer behaviour and expenditure pattern, according to a Boston Consulting Group (BCG) report; and is estimated to surpass USA to become the second largest economy in terms of purchasing power parity (PPP) by the year 2040, according to a report by PricewaterhouseCoopers.

1. Infrastructure projects for future in India

- The Union Budget 2018 reflecting government's focused vision for boosting agricultural and rural economy and the infrastructure spending through the public exchequer, while encouraging greater involvement of private sector participants. It was current Government's last full year budget ahead of the general elections to be held in 2019.
- Government's focus has not only been on 'Ease of Doing Business' but the announcement to build 1 crore houses by 2019 in rural areas under the mission 'Housing for All by 2022' has shown government's focus on 'Ease of Living' as well.

- The estimated budgetary and extra-budgetary expenditure on infrastructure has been increased to Rs 5.97 lakh crore for fiscal year 2018-19, this will certainly contribute to economic growth, connect and integrate the nation with a network of roads, airports, railways, ports and inland waterways.
- The ambitious Bharatmala Pariyojana with an estimated cost of Rs 5.35 lakh crore has been approved. The railways' capital expenditure for the fiscal year 2018-19 has been proposed at Rs 1.48 lakh crore. The government stated that additional 3.7 million homes will be built in urban areas in 2018-19, and 5.1 million homes in rural areas. These initiatives will create job opportunities and facilitate generation of employment.
- India will require around \$4.5 trillion in the next 25 years for infrastructure development, of which it will be able to garner about \$3.9 trillion, according to the Economic Survey. Hence, India to realize its infrastructure dreams, the government must revisit public-private partnership (PPP) models and re-instate confidence into the private sector, which's lagging at this point of time.

GLOBAL ECONOMIC OUTLOOK

The global upswing in economic activity is strengthening. Global growth, which in 2016 was the weakest since the global financial crisis at 3.2 percent, is projected to rise to 3.6 percent in 2017 and to 3.7 percent in 2018. The growth forecasts for both 2017 and 2018 are 0.1 percentage point stronger compared with the April 2017 World Economic Outlook (WEO) forecast. Broad-based upward revisions in the euro area, Japan, emerging Asia, emerging Europe, and Russia—where growth outcomes in the first half of 2017 were better than expected—more than offset downward revisions for the United States and the United Kingdom.

But the recovery is not complete: while the baseline outlook is strengthening, growth remains weak in many countries, and inflation is below target in most advanced economies. Commodity exporters, especially of fuel, are particularly hard hit as their adjustment to a sharp step-down in foreign earnings continues. And while short-term risks are broadly balanced, medium-term risks are still tilted to the downside. The welcome cyclical pickup in global activity thus provides an ideal window of opportunity to tackle the key policy challenges—namely to boost potential output while ensuring its benefits are broadly shared, and to build resilience against downside risks. A renewed multilateral effort is also needed to tackle the common challenges of an integrated global economy.

The global pickup in activity that started in the second half of 2016 gained further momentum in the first half of 2017. Growth is projected to rise over this year and next in emerging market and developing economies, supported by improved external factors—a benign global financial environment and a recovery in advanced economies. Growth in China and other parts of emerging Asia remains strong, and the still-difficult conditions faced by several commodity exporters in Latin America, the Commonwealth of Independent States, and sub-Saharan Africa show some signs of improvement. In advanced economies, the notable 2017 growth pickup is broad based, with stronger activity in the United States and Canada, the euro area, and Japan. Prospects for medium-term growth are more subdued, however, as negative output gaps shrink (leaving less scope for cyclical improvement) and demographic factors and weak productivity weigh on potential growth.

The welcome cyclical pickup in global economic activity after disappointing growth over the past few years provides an ideal window of opportunity to undertake key reforms designed to boost potential output and ensure that its benefits are broadly shared and to build resilience against downside risks. With countries still facing differences in cyclical conditions, varied stances of monetary and fiscal policy remain appropriate. Completing the economic recovery and adopting strategies to ensure fiscal sustainability remain important goals in many economies.

Important areas of strategic focus include:

- Raising potential output: Structural reforms and growth-friendly fiscal policy are needed to boost productivity and labor supply, with differing priorities across countries. Looking ahead, ongoing structural transformation (labor-saving technological change and cross-border competition) demands comprehensive policy approaches, including policies that reduce the pain of adjustment and provide opportunities for all.
- Securing the recovery and building resilience: In advanced economies, monetary policy settings should remain accommodative until there are firm signs of inflation returning to targets. Still-subdued wage pressures mostly reflect remaining slack, not fully captured by headline unemployment rates. At the same time, stretched asset valuations and increasing leverage in some parts of the financial sector require close monitoring, with proactive micro- and macro prudential

supervision, as necessary. The stance of fiscal policy should be aligned with structural reform efforts, taking advantage of favorable cyclical conditions to place public debt on a sustainable path while supporting demand where still needed and feasible.

- **Cross-Border Impacts of Fiscal Policy:** It emphasizes, higher public spending designed to boost potential output can result in both domestic benefits as well as positive spillovers to other countries, especially if it involves economies with slack and monetary accommodation. Indeed, adopting these policy recommendations would help reduce external imbalances, notably for advanced economies with excess surpluses, where stronger domestic demand would offset negative demand effects from the needed rebalancing by deficit countries. In many emerging market and developing economies, fiscal space to support demand is limited, especially in commodity exporters. But monetary policy can generally be supportive, as inflation appears to have peaked in many countries. Exchange rate flexibility helps with the adjustment to commodity price shocks. Efforts to improve governance and the investment climate would also strengthen growth prospects. In low-income countries, many of which need to undertake durable fiscal adjustment efforts and reduce financial vulnerabilities, growth enhancing reforms would help make the best use of the coming demographic dividend by spurring job creation.
- **Strengthening international cooperation:** For many of the challenges that the global economy confronts, individual country actions can be more effective if supported by multilateral cooperation. Preserving the global economic expansion will require policymakers to avoid protectionist measures and to do more to ensure that gains from growth are shared more widely. In addition to preserving an open trading system, key areas for collective action include: safeguarding global financial stability; achieving equitable tax systems and avoiding a race to the bottom; continuing to support low-income countries as they pursue their development goals; and mitigating and adapting to climate change.

RECENT DEVELOPMENT IN SOUTH ASIA

In South Asia, growth slowed to a still strong 6.5 percent in 2017, below the June forecast, in part reflecting adjustment in India to the new Goods and Services Tax and the adverse impact of natural disasters across the region. Growth is expected to stabilize around 7 percent a year over 2018-2020, with private consumption remaining strong and investment recovered by infrastructure projects and reforms. Main risks to the outlook include setbacks in reviving investment, fiscal slippages, and disruptions to activity resulting from natural disasters.

In India, growth slowed for the fifth consecutive quarter to 5.7 percent (year-on-year) in the first quarter of FY 2017/18 (April-June 2017), partly reflecting adjustments by businesses to the prospective introduction of the GST in July 2017. In addition, protracted balance sheet weaknesses— in particular, a corporate debt overhang and elevated non-performing loans in the banking sector—continued to weigh on already weak private investment (World Bank 2017y). Weak private investment was only partly mitigated by a public infrastructure investment push and a surge in current expenditures after recent public pay hikes. In the second quarter of FY2017/18 (July-September 2017), the slowdown in economic activity bottomed out by a still weak 6.3 percent (year-on-year) growth. The manufacturing Purchasing Managers' Index (PMI) and industrial production growth remained broadly expansionary after they temporarily weakened as producers reduced inventories amid uncertainty relating to the implementation of the GST. Despite a recent uptick, inflation remained within the Reserve Bank of India's (RBI) target band of 2-6 percent, following a steady decline over the past year to 1.3 percent in July amid weak food prices. Fiscal consolidation has continued in the central government, but sub national fiscal deficits have risen, partly reflecting debt payments taken over through Ujwal Discom Assurance Yojana (UDAY) and a broader shift in public expenditures from central to state governments, and recent public pay hikes.

India's labour force is expected to touch 160-170 million by 2020, based on rate of population growth, increased labour force participation, and higher education enrolment, among other factors, according to a study by ASSOCHAM and Thought Arbitrage Research Institute. India's foreign exchange reserves were US\$ 404.92 billion in the week up to December 22, 2017, according to data from the RBI.

Government Initiatives

In the Union Budget 2017-18, the Finance Minister, verified that the major push of the budget proposals is on growth stimulation, providing relief to the middle class, providing affordable housing, curbing black money, digitalisation of the economy, enhancing transparency in political funding and simplifying the tax administration in the country.

India's unemployment rate has declined to 4.8 per cent in February 2017 compared to 9.5 per cent in August 2016, as a result of the Government's increased focus towards rural jobs and the Mahatma Gandhi National Rural Employment Guarantee Act (MGNREGA) scheme. The Government of Maharashtra has set a target to double farm income by 2022 through measures like large scale micro irrigation, water conservation, expansion of formal cash credit coverage, crop insurance and agriculture diversification, as per Mr Vidyasagar Rao, Governor of Maharashtra.

Numerous foreign companies are setting up their facilities in India on account of various government initiatives like Make in India and Digital India. Government of India has launched the Make in India initiative with an aim to boost the manufacturing sector of Indian economy, to increase the purchasing power of an average Indian consumer, which would further boost demand, and hence spur development, in addition to benefiting investors. The Government of India, under the Make in India initiative, is trying to give boost to the contribution made by the manufacturing sector and aims to take it up to 25 per cent of the GDP from the current 17 per cent. Besides, the Government has also come up with Digital India initiative, which focuses on three core components: creation of digital infrastructure, delivering services digitally and to increase the digital literacy.

Road Ahead

India's gross domestic product (GDP) is expected to reach US\$ 6 trillion by FY27 and achieve upper-middle income status on the back of digitisation, globalisation, favourable demographics, and reforms. India is also focusing on renewable sources to generate energy. It is planning to achieve 40 per cent of its energy from non-fossil sources by 2030 which is currently 30 per cent and also have plans to increase its renewable energy capacity from 57 GW to 175 GW by 2022. India is expected to be the

third largest consumer economy as its consumption may triple to US\$ 4 trillion by 2025, owing to shift in consumer behaviour and expenditure pattern, according to a Boston Consulting Group (BCG) report; and is estimated to surpass USA to become the second largest economy in terms of purchasing power parity (PPP) by the year 2040, according to a report by PricewaterhouseCoopers.

SERVICES SECTOR CLASSIFICATION

INFRASTRUCTURE

Infrastructure is a key driver of the overall development of Indian economy. This sector focuses on major infrastructure sectors such as power, roads and bridges, dams and urban infrastructure. The changing infrastructure landscape in India has generated significant interest from international investors. This section provides details of various Government of India policies and plans aimed at improving the infrastructure, with specific focus on urban transformation (Smart City, AMRUT, HRIDAY) and Namami Gange.

Accelerating implementation of infrastructure projects for future in India

- The Union Budget 2018 reflecting government's focused vision for boosting agricultural and rural economy and the infrastructure spending through the public exchequer, while encouraging greater involvement of private sector participants. It was current Government's last full year budget ahead of the general elections to be held in 2019.
- Government's focus has not only been on 'Ease of Doing Business' but the announcement to build 1 crore houses by 2019 in rural areas under the mission 'Housing for All by 2022' has shown government's focus on 'Ease of Living' as well.
- The estimated budgetary and extra-budgetary expenditure on infrastructure has been increased to Rs 5.97 lakh crore for fiscal year 2018-19, this will certainly contribute to economic growth, connect and integrate the nation with a network of roads, airports, railways, ports and inland waterways.
- The ambitious Bharatmala Pariyojana with an estimated cost of Rs 5.35 lakh crore has been approved. The railways' capital expenditure for the fiscal year 2018-19 has been proposed at Rs 1.48 lakh crore. The government stated that additional 3.7 million homes will be built in urban areas in 2018-19, and 5.1 million homes in rural areas. These initiatives will create job opportunities and facilitate generation of employment.
- India will require around \$4.5 trillion in the next 25 years for infrastructure development, of which it will be able to garner about \$3.9 trillion, according to the Economic Survey. Hence, India to realize its infrastructure dreams, the government must revisit public-private partnership (PPP) models and re-instate confidence into the private sector, which's lagging at this point of time.

SMART CITY MISSION

The Centre has released nearly Rs 9,940 crore to the states so far for the Smart Cities Mission, with Maharashtra accounting for the highest amount of Rs 1,378 crore, followed by Madhya Pradesh getting Rs 984 crore, according to government data.

The total proposed investment in these cities was Rs 2.03 lakh crore.

Under the mission, the cities propose to take up various projects, including "smart" roads, rejuvenation of water bodies, cycle tracks, walking paths, smart classrooms, skill development centres, upgradation of health facilities, and pan city projects like integrated command and control centre.

EMPLOYEES STATE INSURANCE ACT, 1948 (ESI Act)

The promulgation of Employees' State Insurance Act, 1948(ESI Act), by the Parliament was the first major legislation on social Security for workers in independent India. It was a time when the industry was still in a nascent stage and the country was heavily dependent on an assortment of imported goods from the developed or fast developing countries. The deployment of manpower in manufacturing processes was limited to a few select industries such as jute, textile, chemicals etc. The legislation on creation and development of a fool proof multidimensional Social Security system, when the country's economy was in a very fledgling state was obviously a remarkable gesture towards the socio economic amelioration of a workforce though limited in number and geographic distribution. India, notwithstanding, thus, took the lead in providing organized social protection to the working class through statutory provisions.

The ESI Act, 1948, encompasses certain health related eventualities that the workers are generally exposed to such as sickness, maternity, temporary or permanent disablement, Occupational disease or death due to employment injury, resulting in loss of wages or earning capacity-total or partial. Social security provision made in the Act to counterbalance or negate the resulting physical or financial distress in such contingencies, are thus, aimed at upholding human dignity in times of crises through protection from deprivation, destitution and social degradation while enabling the society the retention and continuity of a socially useful and productive manpower.

The ID Act was enacted to make provision for investigation and settlement of industrial disputes and for other purposes specified therein. Employees may also be subject to the terms of their employment contracts with their employer, which contracts are regulated by the provisions of the Indian Contract Act, 1872. The ID Act also sets out certain requirements in relation to the termination of the services of the workman. The ID Act includes detailed procedure prescribed for resolution of disputes with labour, removal and certain financial obligations up on retrenchment. The Industrial Dispute (Central) Rules, 1957 specify procedural guidelines for lockouts, closures, lay-offs and retrenchment.

CONTRACT LABOUR (REGULATION AND ABOLITION) ACT, 1970

The purpose of Contract Labour (Regulation and Abolition) Act, 1970 is to regulate the employment of contract labour in certain establishments to provide for its abolition and certain circumstances and for matters connected herewith.

joining scheme. The employer shall prepare a Family Pension Fund contribution card in respect of the entire employee who is member of the fund.

MINIMUM WAGES ACT, 1948

The Policy seeks to extend the coverage, and fill in gaps that still exist, in light of present knowledge and accumulated experience. The dominant theme of this policy is that while conservation of environmental resources is necessary to secure livelihoods and well-being of all, the most secure basis for conservation is to ensure that people dependent on particular resources obtain better livelihoods from the fact of conservation, than from degradation of the resource. Deferred tax assets are recognized only to the extent there is reasonable certainty that the assets can be realized in future. However, where there is unabsorbed Depreciation or carry forward of losses, deferred tax assets are recognized only if there is a virtual certainty of realization of such assets. Deferred tax assets are revised at each Balance Sheet date & written down or written up to reflect the amount that is reasonably /virtually certain (as case may be) to be realized.

c) Minimum Alternate Tax

Minimum Alternate Tax (MAT) paid in a year is charged to the Statement of Profit and Loss as current tax. The Company recognizes MAT credit available as an asset only to the extent there is convincing evidence that the Company will pay normal income tax during the specified period, i.e., the period for which MAT Credit is allowed to be carried forward. In the year in which the Company recognizes MAT Credit as an asset in accordance with the Guidance Note on Accounting for Credit Available in respect of Minimum Alternate Tax under the Income Tax Act, 1961, the said asset is created by way of credit to the statement of Profit and Loss and shown as "MAT Credit Entitlement". The Company reviews the "MAT Credit Entitlement" asset at each reporting date and writes down the asset to the extent the company does not have convincing evidence that it will pay normal tax during the sufficient period.

14. Provisions, Contingent Liabilities and Contingent Assets

A provision is recognized when the Company has a present obligation as a result of past event; it is probable that an outflow of resources will be required to settle the obligation, in respect of which a reliable estimate can be made. Provisions are not discounted to its present value and are determined based on the best estimate required to settle the obligation at the Balance Sheet date. These are reviewed at each Balance Sheet date and adjusted to reflect the current best estimates.

Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company. A present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or reliable estimate of the amount cannot be made, is also termed as contingent liability. A contingent asset is neither recognized nor disclosed in the financial statements.

15. Earnings Per Share

Basic earnings per share are calculated by dividing the net profit or loss for the year attributable to equity shareholders by the weighted average number of equity shares outstanding during the year.

For the purpose of calculating diluted earnings per share, the net profit or loss for the year attributable to equity shareholders and the weighted average number of shares outstanding during the year are adjusted for the effect of all dilutive potential equity shares."

16. Foreign Currency Transactions

- a) Transactions denominated in the foreign currencies are recorded at the exchange rate prevailing on the date of transaction or that approximates the actual rate at the date of transaction.
- b) Any income or expenses on account of exchange differences either on settlement or on translation is recognized in the Profit & Loss account except in the case of long term liabilities, where they relate to acquisition of fixed assets, in which case they are adjusted to the carrying amount of such asset.

17. Cash and cash equivalents

For instance, assume a Price Band of 20 to 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount ()	Cumulative Quantity	Subscription
500	24	500	16.67%
1000	23	1500	50.00%
1500	22	3000	100.00%
