An investment in our Equity Shares involves a high degree of financial risk. Prospective investors should carefully consider all the information in the Draft Prospectus, particularly the “Financial Information of the Company” and the related notes, “Our Business” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” on page 141, 91 and 144 respectively and the risks and uncertainties described below, before making a decision to invest in our Equity Shares.

The risk factors set forth below are not exhaustive and do not purport to be complete or comprehensive in terms of all the risk factors that may arise in connection with our business or any decision to purchase, own or dispose of the Equity Shares. This section addresses general risks associated with the industry in which we operate and specific risks associated with our Company. Any of the following risks, individually or together, could adversely affect our business, financial condition, results of operations or prospects, which could result in a decline in the value of our Equity Shares and the loss of all or part of your investment in our Equity Shares. While we have described the risks and uncertainties that our management believes are material, these risks and uncertainties may not be the only risks and uncertainties we face. Additional risks and uncertainties, including those we currently are not aware of or deem immaterial, may also have an adverse effect on our business, results of operations, financial condition and prospects.

This Draft Prospectus contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Draft Prospectus. The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors below. However, there are risk factors the potential effects of which are not quantifiable and therefore no quantification has been provided with respect to such risk factors. In making an investment decision, prospective investors must rely on their own examination of our Company and the terms of the Issue, including the merits and the risks involved. You should not invest in this Issue unless you are prepared to accept the risk of losing all or part of your investment, and you should consult your tax, financial and legal advisors about the particular consequences to you of an investment in our Equity Shares.

Materiality

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

- 1. Some events may not be material individually but may be found material collectively.*
- 2. Some events may have material impact qualitatively instead of quantitatively.*
- 3. Some events may not be material at present but may be having material impact in future.*

Note: The risk factors as envisaged by the management along with the proposals to address the risk if any. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial implication of any of the risks described in this section.

In this Draft Prospectus, any discrepancies in any table between total and the sums of the amount listed are due to rounding off. Any percentage amounts, as set forth in “Risk Factors” on page 23 and “Management Discussion and Analysis of Financial Condition and Results of Operations” on page 144 unless otherwise indicated, has been calculated on the basis of the amount disclosed in the “Restated Financial Statements”.

Promoter and waste our corporate resources and we may incur significant expenses in such proceedings and may have to make provisions in our financial statements, which could increase our expenses and liabilities. 2. The extent to which the outbreak of COVID –19 could have an impact on our business, results of operations and financial condition will depend on future developments, which are uncertain and cannot be predicted.

In the first half of calendar year 2020, COVID-19 spread to a majority of countries across the world, including India and other countries where our suppliers and customers are located. There have been multiple waves of infections that have impacted certain countries, with India most recently experiencing a third wave of infections that significantly increased the number of persons impacted by COVID-19. Since March 2021, there was a significant resurgence in the daily number of new COVID-19 cases and resulting deaths and the GoI and State governments in India re-imposed lockdowns and other more restrictive measures in an effort to stop the resurgence of new infections. These have all contributed to negative economic impact on the Indian economy and consequently our business and operations. It is possible that the COVID-19 pandemic will continue to cause a prolonged global economic crisis or recession.

The global impact of the COVID-19 pandemic has been rapidly evolving and public health officials and governmental authorities had reacted by taking measures, including in the regions in which we operate, such as prohibiting people from assembling in heavily populated areas, instituting quarantines, restricting travel, issuing lockdown orders and restricting the types of businesses that may continue to operate, among many others. On March 14, 2020, India declared COVID-19 as a “notified disaster” for the purposes of the Disaster Management Act, 2005 and imposed a nationwide lockdown from March 25, 2020. The nationwide lockdown lasted until May 31, 2020, and has since been extended periodically in varying degrees by state governments and local administrations. The lifting of the lockdowns across various regions had been regulated with limited and progressive relaxations being granted for movement of goods and people in other places and calibrated re-opening of businesses and offices. Similarly, we resumed our business activities on a gradual basis in line with the prevailing guidelines issued by the governmental authorities at that time.

From March 2021 onwards, due to a “second wave” of increases in the number of daily COVID-19 cases, several state governments in India re-imposed lockdowns, curfews and other restrictions to curb the spread of the virus. We have monitored and are monitoring the situation closely and are operating our activities with the required workforce as permitted by governmental authorities. Additionally, towards the end of calendar year 2021, World Health Organisation designated Omicron, a variant that causes COVID –19, of a great concern. As a result of the detection of new mutated strains and subsequent waves of COVID-19 infections in several states in India as well as throughout various parts of the world, it is anticipated that we may be subject to further reinstatements of lockdown protocols or other restrictions, and the COVID-19 pandemic may continue to affect our business, results of operations and financial condition, in the future, in a number of ways such as:

- complete or partial closure of, or disruptions or restrictions on our ability to conduct, our manufacturing operations. For example, on account of the lockdown, our operations were temporarily shut down at our Faridabad Facility in Haryana from March 23, 2020 to March 31, 2020;
- our ability to travel, interact with potential customers, pursue partnerships and other business transactions;
- our inability to source key raw materials as a result of the temporary or permanent closure of the facilities of suppliers of our key raw materials;

- a portion of our workforce being unable to work, including because of travel or government restrictions in connection with COVID-19, including stay at home order, which could result in a slowdown in our operations;
- our proposed products becoming delayed;
- our inability to access debt and equity capital on acceptable terms, or at all;
- delays in orders or delivery of orders, which may negatively impact our cash conversion cycle and ability to convert our backlog into cash;
- inability to collect full or partial payments from customers due to deterioration in customer liquidity;
- uncertainty as to what conditions must be satisfied before government authorities completely lift lockdown orders;
- the potential negative impact on the health of our employees, particularly if a significant number of them are afflicted by COVID-19, could result in a deterioration in our ability to ensure business continuity during this disruption; and
- disruptions in supply chain leading to higher prices in raw material, impacting our profitability.

Further, our insurance policies may not provide adequate coverage in circumstances, such as the COVID-19 pandemic. For further details, please see “Our Business” on page 91. For further details, please see “Financial Statements” on page 141. Any intensification or escalation of the COVID-19 pandemic or any future outbreak of another highly infectious or contagious disease may adversely affect our business, financial condition and results of operations. In addition, we generate a major part of our revenue through our operations in India. The effects of COVID-19 in India may be of a greater magnitude, scope and duration than those experienced to date in other countries. Further, as COVID-19 adversely affects our business and results of operations, it may also have the effect of exacerbating many of the other risks described in this “Risk Factors” section.

3. Our manufacturing activities are dependent upon availability of skilled and unskilled labours.

We do not have any permanent arrangement of labour and recruitments are made as per requirements except for those who are on permanent pay rolls of our Company. Our manufacturing activities are dependent on availability of skilled and unskilled labour. Non-availability of labour at any time or any disputes with them may affect our production schedule and timely delivery of our products to customers.

Further, we spend significant time and resources in training the manpower we hire. Our success is substantially dependent on our ability to recruit, train and retain skilled manpower. High attrition and competition for manpower may limit our ability to attract and retain the skilled manpower necessary for our future growth requirements. We cannot assure you that skilled manpower will continue to be available in sufficient numbers suitable to our requirements or that we will be able to grow our workforce in a manner consistent with our growth objectives, which may affect our business, financial condition, results of operations and prospects.

4. We do not have long-term agreements with most of our suppliers or customers and the loss of one or more of them or a reduction in their demand for our products could adversely affect our business, results of operations, financial condition and cash flows. Further, our inability to accurately forecast demand for our products or manage our inventory or working capital requirements may have an adverse effect on our business, results of operations and financial condition.

The primary raw materials used for our manufacturing process are natural rubber, zinc oxide, calcium carbonate, chalk powder (impure form of calcium carbonate), resin, chlorinated paraffin, tin stabilizer and EPDM Rubber. All the raw materials are purchased from third parties. We typically do not enter into long-term supply contracts with any of our suppliers with respect to our raw material requirements and typically place orders with them in advance of our anticipated requirements. We believe that efficient inventory management is a key component of the success of our business, results of operations and profitability and to

that end we maintain a reasonable level of inventory of raw materials, work in progress and finished goods at our manufacturing facility. While we forecast the demand and price for our products and accordingly, plan our production volumes, any error in our forecast due to inter alia the domestic scale of our operations and demand for our products, could result in a reduction in our profit margins and surplus stock, which may result in additional storage cost and such surplus stock may not be sold in a timely manner, or at all.

We typically do not enter into long-term agreements with most of our customers. Our relationship with our customers is generally on a non-exclusive basis and accordingly, our customers may choose to cease sourcing our products and choose to source alternative options. Therefore, we cannot assure that we will receive repeat orders from our customers in the future. Additionally, our customers have high and stringent standards for product quantity and quality as well as delivery schedules. Any failure to meet our customers' expectations and specifications could result in the cancellation or non-renewal of contracts. There are also a number of factors, other than our performance, that could cause the loss of a customer such as:

- a) increase in prices of raw materials and other input costs;
- b) changes in consumer preferences;
- c) changes in governmental or regulatory policy, etc.

Any of these factors may have an adverse effect on our business, results of operations and financial condition. Further, absence of any contractual exclusivity with respect to our business arrangements with such customers poses a threat on our ability to be able to continue to supply our products to these customers in the future.

5. *Our Company had negative cash flows from our operating activities, investing activities as well as financing activities in some of the previous year(s) as per the Restated Standalone Financial Statements and the same are summarized as under:*

Our Company had negative cash flows from our operating activities, investing activities as well as financing activities in some of the previous year(s) as per the Restated Standalone Financial Statements and the same are summarized as under:

Particulars	(Rs. In Lakhs)		
	As on March 31, 2022	As on March 31, 2021	As on March 31, 2020
Cash Flow from/ (used in) Operating Activities	(147.76)	(147.84)	29.82
Cash Flow from/ (used in) Investing Activities	(0.53)	(0.41)	(11.59)
Cash Flow from/ (used in) Financing Activities	151.93	131.08	(19.83)

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flow in future, it may adversely affect our business and financial operations.

6. *Any increase in the cost of our raw material or other purchases or a shortfall in the supply of our raw materials, may adversely affect the pricing and supply of our products and have an adverse effect on our business, results of operations and financial condition.*

The success of our operations depends on a variety of factors, including our ability to source raw materials at competitive prices. For the three-month period ended June 30, 2022 and for Fiscals 2022 and 2021, our cost of raw materials consumed constituted 35.32%, 44.41% and 37.13% respectively, of our total expenses which amounted to Rs. 466.69 Lakhs, Rs. 1569.77 Lakhs and Rs. 1544.88 Lakhs, respectively. Raw material supply and pricing can be volatile due to a number of factors beyond our control, including demand and supply, general economic and political conditions, transportation and labour costs, natural disasters,

pandemic, competition and there are inherent uncertainties in estimating such variables, regardless of the methodologies and assumptions that we may use.

We seek to source our raw materials from reputed suppliers and typically seek quotations from multiple suppliers. We typically do not enter into long-term agreements with our suppliers. We may be required to track the supply demand dynamics and regularly negotiate prices with our suppliers in case of significant fluctuations in raw material prices or foreign currency fluctuations.

Further, we procure a large portion of our raw materials from a few key suppliers, any disruption of supply of raw materials from such suppliers could adversely impact our operations and business if we are unable to replace such suppliers in a timely manner. Cost of raw materials sourced from our top ten suppliers accounted for 90.20 %, 62.50 % and 73.85% of the total cost of raw materials consumed during the three-month period ended June 30, 2022 and for Fiscals 2022 and 2021 which was to Rs. 300.62 Lakhs, Rs. 943.59 Lakhs and Rs. 1133.23 Lakhs respectively. We cannot assure you that we will be able to enter into new arrangements with suppliers on terms acceptable to us, which could have an adverse effect on our ability to source raw materials in a commercially viable and timely manner, if at all, which may impact our business and profitability. We are also subject to the risk that one or more of our existing suppliers may discontinue their operations, which may adversely affect our ability to source raw materials at a competitive price. Additionally, there can be no assurance that demand, capacity limitations or other problems experienced by our suppliers will not result in occasional shortages or delays in their supply of raw materials.

If we were to experience a significant or prolonged shortage of raw materials from any of our suppliers, and we cannot procure the raw materials from other sources, we would be unable to meet our production schedules for our key products and to deliver such products to our customers in a timely manner, which would adversely affect our sales, margins and customer relations. Therefore, we cannot assure you that we will be able to procure adequate supplies of raw materials in the future, as and when we need them and on commercially acceptable terms.

7. The Company is dependent on few numbers of customers. Any loss of top 10 customers will significantly affect our revenues and profitability.

8. Our Company has not filed Charge creation form as prescribed under the Companies Act with Registrar of Companies.

Our loans originally belonged to a proprietorship firm under the name and style of M/s Goyal Rubbers owned by our Promoter Mr. Manoj Kumar Aggarwal. The proprietorship started its operation in April 2009. On March 31, 2022, our promoters incorporated our company, Gayatri Rubbers and Chemicals Limited, under a Certificate of Incorporation issued by the Registrar of Companies, with one of the objects to takeover the complete assets and liabilities of M/s Goyal Rubbers on going concern basis. Our company took over the proprietorship concern w.e.f. April 15, 2022.

In line with the above, our Company is in the process to migrate the loans of erstwhile proprietorship firm in the name of company & accordingly our Company will file required form as per the Companies Act with

Registrar of Companies. If our company fails to comply with the provisions for filing of forms, then the company and every officer of the company who is in default will be punishable under the Companies Act 2013.

9. We do not maintain general insurance for our manufacturing facility and this may not be adequate to protect us against all potential losses to which we may be subject to and this may have a material adverse effect on our business.

We do not have Insurance cover to protect all our losses or liabilities that may arise from our operations. If we suffer a significant uninsured loss, our business, financial condition and results of operations may be materially and adversely affected.

10. We have not obtained Factory Licence and pollution certificates.

We have not obtained factory license under the Factories Act, 1948 & pollution certificates/approvals under the various laws for our manufacturing unit situated at Plot No. 11, Gali No. 3, Opp. Beri Ka Bagh, Malerna Road, Ballabhgarh, Faridabad-121004, Haryana, India. Failure to obtain the same may have an adverse effect on our business, results of operations, profitability and financial condition.

Any penalty imposed for non-compliance in future by any regulatory authority could affect our financial conditions to that extent. Such delay/non-compliance may in the future render us liable to statutory provisions concerned. However, none of our competitors in the Ballabhgarh, Faridabad area has been issued such license/approval till date by the State or Central government. We will apply for such approvals as soon as we get more clarity over the legal requirements.

11. We do not own the premises at which our registered office is located and the same is taken on rent. Any termination of such rent agreement and/or non-renewal could adversely affect our operations.

Our registered office is not owned by us and same has been taken on the lease. It has been taken on lease from one of the Promoters Mr. Manoj Kumar Aggarwal for a period of 3 (Three) years from April 01, 2022 to March 31, 2027 for monthly rent of Rs. 50,000/- (Rupees Fifty Thousand only) with the condition of 10% increase in rent every year.

Any termination of such rent agreement whether due to any breach or otherwise or non-renewal thereof, can adversely affect the business operations. For further details regarding our registered office, please refer to chapter titled ‘Our Business’ on page 91.

12. Failure to recover amounts from our Sundry Debtors/Trade Receivables on a timely manner might affect our financial conditions.

Following are the details of Top 10 customers of our company:

Top 10 Debtors contribute	358.33	247.21	276.53
% of Total Trade Receivables	84.64%	89.43%	81.66%

If we are unable to recover balance amount in a timely manner it might affect our financial conditions and profitability.

13. Our operations are labour intensive and our manufacturing operations may be materially adversely affected by strikes, work stoppages or increased wage demands by our employees or those of our suppliers.

Our operations are labour intensive and we are dependent on a large labour force for our manufacturing operations. As of June 30, 2022, we employed 16 employees at various levels of the organization and around 30 contract laborers. The success of our operations depends on availability of labour and maintaining good relationship with our workforce. Shortage of skilled/ unskilled personnel or work stoppages caused by disagreements with employees could have an adverse effect on our business and results of operations. While we have not experienced any major prolonged disruption in our business operations due to disputes or other problems with our work force in the past, there can be no assurance that we will not experience any such disruption in the future. Such disruptions may adversely affect our business and results of operations and may also divert the management's attention and result in increased costs.

We are also subject to laws and regulations governing relationships with employees, in such areas as minimum wage and maximum working hours, overtime, working conditions, hiring and terminating of employees and work permits.

14. One of our Key Management Personnel are associated with the Company less than one year.

Our Company has appointed Mrs. Megha Vashishtha as the Company Secretary and Compliance Officer of the Company vide board resolution dated August 01, 2022 but due to some technical reasons we are not able to file DIR 12 with Registrar of Companies. As per Companies Act, 2013, 30 days are provided to file the required eform. If our company fails to comply with the provisions for filing of forms under the provisions of the Companies Act, then the company and every officer of the company who is in default is punishable with fine.

For details of Key Management Personnel and their appointment, please refer the chapter "*Our Management*" beginning on page 113.

16. Our indebtedness and the restrictions imposed by our financing agreements could adversely affect our ability to conduct our business and operations.

As of period June 30, 2022, we had total long-term borrowings of Rs.58.20 Lakhs and total short-term borrowings of Rs.102.64 Lakhs. Our ability to meet our debt service obligations and repay our outstanding borrowings will depend primarily on the cash generated by our business. Our financing agreements contain certain restrictive covenants that limit our ability to undertake certain types of transactions. In the event that we breach a restrictive covenant, our lenders could deem us to be in default and seek early repayment of loans. An event of default would also affect our ability to raise new funds or renew maturing borrowings as needed to conduct our operations and pursue our growth initiatives. Although we have received consents from our lenders for the Fresh Issue, these restrictive covenants may affect some of the rights of our Shareholders.

17. Our Promoter have provided personal guarantees to secure certain of our loan facilities, which if revoked or invoked may require alternative guarantees, repayment of amounts due or termination of the facilities.

Our Promoter have provided personal guarantees and mortgaged certain movable properties in relation to certain of our loan facilities and may continue to provide such guarantees after the listing of the Equity Shares pursuant to the Issue. In the event that any of these guarantees are revoked or invoked, the lenders for such facilities may require alternate guarantees, repayment of amounts outstanding under such facilities, or may even terminate such facilities, as applicable. We may not be successful in procuring alternative guarantees satisfactory to the lenders, and as a result, may need to repay outstanding amounts under such facilities or seek additional sources of capital, which may not be available on acceptable terms or at all. Any such failure to raise additional capital could adversely affect our operations and our financial condition.

For further details, kindly refer chapter titles “*Restated Financial Statements*” on Page 141.

18. Our Company has entered into certain related party transactions and may continue to do so in the future.

Our Company has entered into related party transactions with our group entities. While our Company believes that all such transactions have been conducted on the arm’s length basis, there can be no assurance that it could not have been achieved on more favorable terms had such transactions not been entered into with related parties. Furthermore, it is likely that our Company will enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operation.

19. We have certain contingent liabilities, which, if materialized, may affect our financial condition and results of operations.

Our contingent liabilities as of June 30, 2022 were as follows:

(Rs. In Lakhs)

Further, there can be no assurance that we will not incur similar or increased levels of contingent liabilities in the future.

20. Statutory & Peer Review Auditors are associates of Lead Manager.

One of the key personnel of Lead Manager, Mr. Vipin Aggarwal, is also interested in VAPS & Co. as a Part-Time Partner. Further, with effect from November 01, 2017, Mr. Vipin Aggarwal is not performing any attestation function as per the Chartered Accountants Regulations, 1988 for VAPS & Co.

21. Our Promoters play key role in our functioning and we heavily rely on their knowledge and experience in operating our business and therefore, it is critical for our business that our promoters remain associated with us.

We benefit from our relationship with our Promoters and our success depends upon the continuing services of our Promoters who have been responsible for the growth of our business and is closely involved in the overall strategy, direction and management of our business. Our Promoters have been actively involved in the day to day operations and management. Accordingly, our performance is heavily dependent upon the services of our Promoters. If our Promoter is unable or unwilling to continue in his present position, we may not be able to replace them easily or at all. Further, we rely on the continued services and performance of our key executives and senior management for continued success and smooth functioning of the operations of the Company. If we lose the services of any of our key managerial personnel, we may be unable to locate suitable or qualified replacement and may incur additional expenses to recruit and train new personnel, which could adversely affect our business operations and affect our ability to continue to manage and expand our business. Our Promoters have over the years-built relations with various customers and other persons who are form part of our stakeholders and are connected with us. The loss of their services could impair our ability to implement our strategy, and our business, financial condition, results of operations and prospects may be materially and adversely affected.

22. We may not be successful in implementing our business and growth strategies.

The success of our business depends substantially on our ability to implement our business and growth strategies effectively. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted customers/projects. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Further, our growth strategies could place significant demand on our management team and other resources and would require us to continuously develop and improve our operational, financial and other controls, none of which can be assured. Failure to implement our business and growth strategies would have a material adverse effect on our business and results of operations.

23. We require certain approvals or licenses in the ordinary course of business and the failure to renew, obtain or retain them in a timely manner, or at all, may affect our operations.

We require certain statutory and regulatory permission, licenses and approvals to operate our business. We believe that we have obtained all the requisite permission and licenses which are adequate to run our business. However, there is no assurance that there are no other statutory/regulatory requirements which we are required to comply with. Further, some of these approvals are granted for fixed periods of time and need renewal from time to time. We are required to renew such permission, licenses and approvals. Any default by our Company in complying with the same, may result in inter alia the cancellation of such licenses, consents, authorizations and/or registrations, which may adversely affect our operations. There can be no assurance that the relevant authorities will issue or renew any of such permits or approvals in time or at all. Failure to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business.

24. Changes in latest technology or requirement of machinery based on business opportunity may adversely affect Our Company's results of operations and its financial condition.

Modernization and technology upgradation are essential to reduce costs and increase the output. Changes in technology may render our current technologies obsolete or require us to make substantial capital investments. Presently, we are using the machinery as per the best of our knowledge. However, in future we may be required to implement new technology or upgrade the machinery and other equipment's employed by us. Further, the costs in upgrading our technology and modernizing the machinery may be significant which could substantially affect our finances and operations. Also, the cost of implementing new process would require substantial new capital expenditures and could adversely affect our business, prospects, results of operations and financial condition.

25. Conflicts of interest may arise due to similar line of business of our Company and our group entities.

Most of our Group Entities are in same or similar line of business. As a result, conflicts of interests may arise in allocating business opportunities amongst our Company, and our Group entity in circumstances where our respective interests diverge. In cases of conflict, our Promoter may favour other company in which our Promoter has interests. There can be no assurance that our Promoter or our Group Entity or members of the Promoter Group will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours. Any such present and future conflicts could have a material adverse effect on our reputation, business, results of operations and financial condition.

As on the date of Draft Prospectus no agreement is there between our company and group entity in relation to the said conflict of interest. For further details, please refer to the chapter titled “*Our Group Entities*” on page 134.

26. We are exposed to the risk of delays or non-payment by our clients and other counterparties, which may also result in cash flow mismatches.

We are exposed to counter party credit risk in the usual course of our business dealings with our clients or other counterparties who may delay or fail to make payments or perform their other contractual obligations. The financial condition of our clients, business partners and other counterparties may be affected by the performance of their business which may be impacted by several factors including general economic conditions. We cannot assure you of the continued viability of our counterparties or that we will accurately assess their creditworthiness. We also cannot assure you that we will be able to collect the whole or any part of any overdue payments. Any material non-payment or non-performance by our clients, business partners, suppliers or other counterparties could affect our financial condition, results of operations and cash flows.

27. Our Promoter and members of the Promoter Group will continue to jointly retain majority control over our Company after the Issue, which will allow them to determine the outcome of matters submitted to shareholders for approval.

Post this Issue, our Promoter and Promoter Group will collectively own majority of our equity share capital. As a result, our Promoter, together with the members of the Promoter Group, will continue to exercise a significant degree of influence over Company and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act, 2013 and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company.

In addition, our Promoter will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or other shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

28. The average cost of acquisition of Equity Shares by our Promoters is lower than the issue price.

Our Promoters average cost of acquisition of Equity Shares in our Company is may lower than the Issue Price of the shares proposed to be offered though this draft prospectus.

Average Cost of Acquisition:

Sr. No.	Name of Promoters	Number of Equity Shares held	Average cost of Acquisition per Equity Shares (In Rs.)

1	Mr. Shilp Chotai	10,10,000	10
2	Mr. Utsav Chotai	10,10,000	10
3	Mr. Manoj Kumar Aggarwal	21,50,000	10

29. We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and agents may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

30. Our inability to manage growth could disrupt our business and reduce profitability.

A principal component of our strategy is to continuously grow by expanding the capacity, size and geographical scope of our businesses. This growth strategy will place significant demands on our management, financial and other resources. It will require us to continuously develop and improve our operational, financial and internal controls. Continuous expansion increases the challenges involved in financial management, recruitment, training and retaining high quality human resources, preserving our culture, values and entrepreneurial environment, and developing and improving our internal administrative infrastructure. Any inability on our part to manage such growth could disrupt our business prospects, impact our financial condition and adversely affect our results of operations.

31. Our future funds requirements, in the form of fresh issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.

We may require additional capital from time to time depending on our business needs. Any fresh issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favorable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

32. Third party industry and statistical data in this Draft Prospectus may be incomplete, incorrect or unreliable.

Neither Lead Manager nor we have independently verified the data obtained from the official and industry publications and other sources referred in this Draft Prospectus and therefore, while we believe them to be true, there can be no assurance that they are complete or reliable. Such data may also be produced on different bases from those used in the industry publications we have referenced. The discussion of matters relating to India, its economy and our industry in this Draft Prospectus are subject to the caveat that the statistical and other data upon which such discussions are based may be incomplete or unreliable. Industry sources and publications are also prepared based on information as of specific dates and may no longer be current or reflect current trends. Industry sources and publications may also base their information on estimates, projections, forecasts and assumptions that may prove to be incorrect. While industry sources take due care and caution while preparing their reports, they do not guarantee the accuracy, adequacy or completeness of the data or report and do not take responsibility for any errors or omissions or for the results obtained from using their data or report. Accordingly, investors should not place undue reliance on, or base their investment decision on this information.

- 33. We have not commissioned an industry report for the disclosures made in the section titled ‘Our Industry’ and made disclosures on the basis of the data available on the internet and such data has not been independently verified by us.**

We have neither commissioned an industry report, nor sought consent from the quoted website source for the disclosures which need to be made in the section titled “*Our Industry*” beginning on page 82. We have made disclosures in the said chapter on the basis of the relevant industry related data available online for which relevant consents have not been obtained. We have not independently verified such data. We cannot assure you that any assumptions made are correct or will not change and, accordingly, our position in the market may differ from that presented in this Draft Prospectus. Further, the industry data mentioned in this Draft Prospectus or sources from which the data has been collected are not recommendations to invest in our Company. Accordingly, investors should read the industry related disclosure in this Draft Prospectus in this context.

- 34. In addition to normal remuneration or benefits and reimbursement of expenses, some of our Promoters and Directors are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.**

Our Promoters, Directors and Key Managerial Personnel are interested in our Company to the extent of remuneration paid to them for services rendered and reimbursement of expenses payable to them. In addition, some of our Promoters and Directors may also be interested to the extent of their shareholding and dividend entitlement in our Company.

- 35. Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.**

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations financial condition, cash requirements, business prospects and any other financing arrangements.

Additionally, we may not be permitted to declare any dividends under the loan financing arrangement that our Company may enter into future, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof.

Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value.

- 36. There is no monitoring agency appointed by Our Company and the deployment of funds are at the discretion of our Management and our Board of Directors, though it shall be monitored by our Audit Committee.**

As per SEBI (ICDR) Regulations, 2018, as amended, appointment of monitoring agency is required only if Issue size exceeds Rs. 10,000.00 Lakhs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, as per the Section 177 of the Companies Act, 2013, the Audit Committee of our Company would be monitoring the utilization of the Issue Proceeds.

37. There have been some instances of delayed filing of records and returns required to be filed by the Company with various regulatory authorities.

There have been some instances of delayed filing by the Company in respect of the filings required to be made with regulatory authorities, including filings under Companies Act. Till date, the Company has not received any notices from any authorities, however, there can be no assurance that the regulator may not initiate proceedings against us or that we will be able to sufficiently defend against any action initiated by regulators in relation to regulatory compliances for all instances and periods. Any adverse order passed or penalty imposed by regulators on us may adversely affect our business and results of operations.

38. Our trademark or logo  is not registered under Trademarks Act, 1999. If we are unable to protect our trademarks and trade-names, others may be able to use our trademarks and trade-names to compete more effectively.

We have not filed any application for registration of our Logo  under the Trademarks Act, 1999. In case of no registration, our Company may not be able to successfully enforce or protect our intellectual property rights and obtain statutory protections available under the Trademarks Act, 1999, as otherwise available for registered trademarks.

We cannot assure you that we will be able to obtain such registrations in a timely manner. As a result, we may be unable to prevent use of these names or variations thereof by any other party or ensure that we will continue to have a right to use it. We further cannot assure you that any third party will not infringe upon our trademark, logo and/or trade name in a manner that may have a material adverse effect on our business prospects, reputation and goodwill.

39. Our trademark or logo  is not registered under Trademarks Act, 1999. If we are unable to protect our trademarks and trade-names, others may be able to use our trademarks and trade-names to compete more effectively.

We have filed an application vide no. 5559744 for registration of our Logo  under the Trademarks Act, 1999. In case of no registration, our Company may not be able to successfully enforce or protect our intellectual property rights and obtain statutory protections available under the Trademarks Act, 1999, as otherwise available for registered trademarks.

We cannot assure you that we will be able to obtain such registration in a timely manner. As a result, we may be unable to prevent use of these names or variations thereof by any other party or ensure that we will continue to have a right to use it. We further cannot assure you that any third party will not infringe upon our trademark, logo and/or trade name in a manner that may have a material adverse effect on our business prospects, reputation and goodwill.

40. As on the date of this Draft Prospectus, we do not own any intellectual property and may inadvertently infringe the intellectual property rights of others.

We currently do not have any registered trademarks and we are using  as one of our trademarks. This Logo is not owned by us and same is being used by us vide No Objection Certificate dated April 30, 2022

given by M/s. Elements India, an Indian partnership firm constituted by the promoters of the Company i.e. Mr. Shilp Chotai and Mr. Utsav Chotai.

Any termination of such NOC whether due to any breach or otherwise, can adversely affect the business. For further details regarding our Trademarks, please refer to chapter titled “*Our Business*” beginning on page 91.

41. Any future issuance of Equity Shares, or convertible securities or other equity-linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoter or members of our Promoter Group may adversely affect the trading price of the Equity Shares.

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company; adversely affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoter and Promoter Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that our Promoter and Promoter Group will not dispose of, pledge or encumber their Equity Shares in the future.

42. After the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.

An active trading market on the Stock Exchange may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares shall be determined through a book-building process and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

43. Applicants to this Issue are not allowed to withdraw their Applications after the Issue Closing Date.

In terms of the SEBI (ICDR) Regulations, Applicants in this Issue are not allowed to withdraw their Applications after the Issue Closing Date. The Allotment in this Issue and the credit of such Equity Shares to the Applicant’s demat account with its depository participant shall be completed within such period as prescribed under the applicable laws. There is no assurance, however, that material adverse changes in the international or national monetary, financial, political or economic conditions or other events in the nature of force majeure, material adverse changes in our business, results of operation or financial condition, or other events affecting the Applicant’s decision to invest in the Equity Shares, would not arise between the Issue Closing Date and the date of Allotment in this Issue. Occurrence of any such events after the Issue Closing Date could also impact the market price of our Equity Shares. The Applicants shall not have the right to withdraw their applications in the event of any such occurrence. We cannot assure you that the market price of the Equity Shares will not decline below the Issue Price. To the extent the market price for the Equity Shares declines below the Issue Price after the Issue Closing Date, the shareholder will be required to purchase Equity Shares at a price that will be higher than the actual market price of the Equity Shares at that time. Should that occur, the shareholder will suffer an immediate unrealized loss as a result. We may

complete the Allotment even if such events may limit the Applicants' ability to sell our Equity Shares after this Issue or cause the trading price of our Equity Shares to decline.

44. The determination of the Issue Price is based on various factors and assumptions and the Issue Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Issue.

The determination of the Issue Price is based on various factors and assumptions and will be determined by our Company and the Lead Manager. Furthermore, the Issue Price of the Equity Shares will be determined by our Company in consultation with the Lead Manager. These will be based on numerous factors, including market demand and factors as described under "*Basis for Issue Price*" on page 76 and may not be indicative of the market price for the Equity Shares after the Issue.

45. A third party could be prevented from acquiring control of our Company because of anti-takeover provisions under Indian law.

As a listed Indian entity, there are provisions in Indian law that may delay or prevent a future takeover or change in control of our Company. Under the Takeover Regulations, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors/shareholders are protected, these provisions require certain compliances, such as undertaking an open offer, which may prevent a potential acquirer from attempting to take control of our Company. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to our shareholders, it is possible that such a takeover would not be attempted or consummated.

46. Investors will not be able to sell immediately on an Indian stock exchange any of the Equity Shares they purchase in the Issue.

The Equity Shares will be listed on the SME platform of National Stock Exchange of India Limited ("NSE Emerge"). Pursuant to applicable Indian laws, certain actions must be completed before the Equity Shares can be listed and trading in the Equity Shares may commence. After the Basis of Allotment is approved by the Designated Stock Exchange, the Company undertakes the Allotment and the demat account of the Allottees with depository participants in India are credited with the Equity Shares. The Allotment of Equity Shares in this issue, the credit of such Equity Shares to the applicant's demat account with depository participant and trading in the Equity Shares upon receipt of final listing and trading approvals from the Stock Exchange is expected to complete within six working days of the Issue Closing Date (or such other period as prescribed under applicable laws). There could be a failure or delay in listing of the Equity Shares on the Stock Exchange. Any failure or delay in obtaining the approval or otherwise commence trading in the Equity Shares would restrict investors' ability to dispose of their Equity Shares. There can be no assurance that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the time periods as specified herein. We could also be required to pay interest at the applicable rates if allotment is not made, unblocking intimation/ refund intimation, as applicable are not dispatched or demat credits are not made to investors within the prescribed time periods.

47. The requirements of being a publicly listed company may strain our resources.

We are not a publicly listed company and have not, historically, been subjected to the compliance requirement or the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the SEBI Listing Regulations, which will require us to file audited annual and unaudited half yearly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our

reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies.

Further, as a publicly listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required. As a result, our management's attention may be diverted from our business concerns, which may adversely affect our business, prospects, results of operations and financial condition. In addition, we may need to hire additional legal and accounting staff with appropriate experience and technical accounting knowledge, but we cannot assure you that we will be able to do so in a timely and efficient manner.

EXTERNAL RISK FACTORS

48. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, change in regulatory framework, inflation, deflation, foreign exchange fluctuations, consumer credit availability, consumer debt levels, unemployment trends, terrorist threats and activities, worldwide military and domestic disturbances and conflicts, and other matters that influence consumer confidence, spending and tourism.

49. Terrorist attacks, communal disturbances, civil unrest and other acts of violence or war involving may adversely affect the financial markets and our business.

Terrorist attacks and other acts of violence or war may negatively affect the markets on which our Equity Shares trade and also adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence, and adversely affect our business. Such incidents may also create a greater perception that investment in Indian companies involves a higher degree of risk and may have an adverse impact on our business and the price of our Equity Shares. Further, we cannot predict the effects on our business of heightened security measures, threatened terrorist attacks, efforts to combat terrorism, military action against a foreign state or other similar events. Any of these events could also negatively affect the economy and consumer confidence, which could cause a downturn in the service industry. In addition, any deterioration in the relations between India and its neighboring countries might result in investor concern about stability in the region, which could materially and adversely affect the price of our Equity Shares.

50. Any change in environmental laws and other applicable regulations, may adversely affect Our Company's results of operations and its financial condition.

National Green Tribunal (NGT) has taken some strict decisions in respect to environment cases, if business of any of our client is affected due to these changes then it may adversely affect our business operations and revenue. Any Change in the Political environment in the Country may also lead to major change in our services.

51. Any changes in the regulatory framework could adversely affect our operations and growth prospects.

Our Company is subject to various regulations and policies. Our business and prospects could be materially adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that our Company will succeed in obtaining all requisite regulatory

approvals in the future for our operations or that compliance issues will not be raised in respect of our operations, either of which could have a material adverse effect on our business, financial condition and results of operations.

52. Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse effects on our operations and financial performance.

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

53. Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are classified as short-term capital gains and generally taxable. Any gain realized on the sale of listed equity shares on a stock exchange that are held for more than 12 months is considered as long-term capital gains and is taxable at 10%, in excess of Rs. 1,00,000. Any long-term gain realized on the sale of equity shares, which are sold other than on a recognized stock exchange and on which no STT has been paid, is also subject to tax in India. Capital gains arising from the sale of equity shares are exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

54. Public companies in India, including our Company, shall be required to prepare financial statements under Indian Accounting Standards.

Our Company currently prepares its annual financial statements under Indian GAAP. The MCA, Government of India, has, through a notification dated February 16, 2015, set out the Indian Accounting Standards (Ind AS) and the timelines for their implementation. In accordance with such notification, our Company is required to prepare its financial statements in accordance with Ind AS. Ind AS is different in many aspects from Indian GAAP under which our financial statements are currently prepared. Accordingly, the degree to which the financial statements included in the Draft letter of offer will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in the Draft Prospectus should accordingly be limited.

55. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

56. The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its road & rail networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

57. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing even domestically, and the interest rates and other commercial terms at which such additional financing may be unfavorable. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

58. We are subject to risks arising from interest rate fluctuations, which could adversely impact our business, financial condition and operating results.

Changes in interest rates could significantly affect our financial condition and results of operations. If the interest rates for our existing or future borrowings increase significantly, our cost of servicing such debt will increase. This may negatively impact our results of operations, planned capital expenditures and cash flows.

59. There may be less information available in the Indian securities markets than in more developed securities markets in other countries.

There is a difference between the level of regulation and monitoring of the Indian securities markets and that of the activities of investors, brokers and other participants in securities markets in more developed economies. SEBI is responsible for monitoring disclosure and other regulatory standards for the Indian securities market. SEBI has issued regulations and guidelines on disclosure requirements, insider trading and other matters. There may be less publicly available information about Indian companies than is regularly made available by public companies in more developed countries pursuant to such disclosure requirements, which could adversely affect the market for our Equity Shares. As a result, investors may have access to less information about our business, financial condition, cash flows and results of operation, on an ongoing basis, than investors in companies subject to the reporting requirements of other more developed countries.

60. There is no public market for the Equity Shares or Equity Shares outside India.

After this Issue, there will continue to be no public market for our Equity Shares in the United States or any country other than India, we cannot assure you that the face value of the Equity Shares will correspond to the price at which the Equity Shares will trade subsequent to this Issue. This may also affect the liquidity of our Equity Shares and Equity Shares and restrict your ability to sell them.

61. Any trading closures at the Stock Exchanges may adversely affect the trading prices of our Equity Shares.

Secondary market trading in our Equity Shares may be halted by a stock exchange because of market conditions or other reasons. Additionally, an exchange or market may also close or issue trading halts on specific securities, or the ability to buy or sell certain securities or financial instruments may be restricted,

which may adversely impact the ability of our shareholders to sell the Equity Shares or the price at which shareholders may be able to sell their Equity Shares at a particular point in time.

62. Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of salaries, and other expenses relevant to our business.

High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and the same may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase our rates to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected.

Further, the GoI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

SECTION VI – ABOUT THE COMPANY OUR INDUSTRY

GLOBAL OUTLOOK

As per the latest economic outlook by The International Monetary Fund (world-economic-outlook-April-2022), the war in Ukraine has triggered a costly humanitarian crisis that demands a peaceful resolution. Economic damage from the conflict will contribute to a significant slowdown in global growth in 2022.

A severe double-digit drop in GDP for Ukraine and a large contraction in Russia are more than likely, along with worldwide spillovers through commodity markets, trade and financial channels. Even as the war reduces growth, it will add to inflation. Fuel and food prices have increased rapidly, with vulnerable populations—particularly in low-income countries—most affected. High inflation will complicate the trade-offs central banks face between containing price pressures and safeguarding growth. Interest rates are expected to rise as central banks tighten policy, exerting pressure on emerging market and developing economies. Moreover, many countries have limited fiscal policy space to cushion the impact of the war on their economies.

The invasion has contributed to economic fragmentation as a significant number of countries sever commercial ties with Russia and risks derailing the post-pandemic recovery. It also threatens the rules-based frameworks that have facilitated greater global economic integration and helped lift millions out of poverty.

Besides, the conflict adds to the economic strains wrought by the pandemic. Although many parts of the world appear to be moving past the acute phase of the COVID-19 crisis, deaths are still high, especially among the unvaccinated. Moreover, recent lockdowns in key manufacturing and trade hubs in China would compound supply disruptions elsewhere.

Global growth is projected to slow from 6.1% estimated in 2021 to 3.6% in 2022 and 2023. This is 0.8 and 0.2 percentage points lower for 2022 and 2023 than in the January World Economic Outlook Update. Beyond 2023, global growth is forecast to decline to about 3.3% in the medium term. Crucially, this forecast assumes that the conflict is confined to Ukraine, further sanctions on Russia exempt the energy sector (although the impact of European countries' decisions to wean themselves off Russian energy and embargoes announced through March 31, 2022, are factored into the baseline), and the pandemic's health and economic impacts abate over the course of 2022. With a few exceptions, employment and output will typically remain below pre-pandemic trends through 2026.

Scarring effects are expected to be much larger in emerging market and developing economies than in advanced economies—reflecting more limited policy support and generally slower vaccination—with output expected to be below the pre-pandemic trend throughout the forecast period. Unusually high uncertainty surrounds this forecast, and downside risks to the global outlook dominate—including from a possible worsening of the war, escalation of sanctions on Russia, a sharper-than-anticipated deceleration in China as a strict zero-COVID strategy is tested by Omicron, and a renewed flare-up of the pandemic should a new, more virulent virus strain emerge.

Moreover, the war in Ukraine has increased the probability of wider social tensions because of higher food and energy prices, which would further weigh on the outlook. Inflation is expected to be high for longer than previously forecast, driven by war-induced commodity-price increases and broadening price pressures. For 2022, inflation is projected at 5.7% in advanced economies and 8.7% in emerging market and developing economies—1.8 and 2.8 percentage points higher than projected in January.

Although a gradual resolution of supply-demand imbalances and a modest pickup in labour supply are expected in the baseline, easing price inflation eventually, uncertainty still surrounds the forecast. Conditions could significantly deteriorate. Worsening supply-demand imbalances—including those stemming from the war—and further increases in commodity prices could lead to persistently high inflation, rising inflation expectations, and stronger wage growth.

If signs emerge that inflation will be high in the medium term, central banks will be compelled to react faster than currently anticipated—raising interest rates and exposing debt vulnerabilities, particularly in emerging markets. The war in Ukraine has exacerbated two difficult policy trade-offs: between tackling inflation and safeguarding the recovery; and between supporting the vulnerable and rebuilding a fiscal buffer.

INDIAN ECONOMY INSIGHTS

In March 2022, the PMI indicated easing expansion in manufacturing and accelerating growth in services, respectively 54.0 and 53.6. This was accompanied by a sharp increase in input prices. IIP growth increased slightly to 1.7% in February 2022, from 1.5% in January 2022. Retail inflation surged to a 17-month high of 7% in March 2022, breaching the RBI's 6% upper tolerance limit for the second successive month. On an annual basis, it was 5.5% in FY22 compared to 6.2% in FY21. Wholesale inflation surged to a four-month high of 14.5% in March 2022, led by inflationary pressures stemming from higher global crude and primary commodity prices. On an annual basis, wholesale inflation accelerated to 13% in FY22 from 1.3% in FY21.

According to the Controller General of Accounts (CGA), from April '21 to February '22 the Centre's gross tax revenues grew 36.6% with 53.3% and 23.3% growth in direct and indirect taxes respectively. The Centre's expenditure grew 11.5%; revenue expenditure grew 10.2%; capital expenditure, 19.7%. The Centre's fiscal and revenue deficits were respectively 82.7% and 79.7% of their FY22 RE. Merchandise exports and imports growths were high at respectively 19.8% and 24.2% in March 2022 compared to 25.1% and 36.1% in February 2022. Merchandise exports at \$419.7bn in FY22 surpassed the target of \$400bn, growing at an unprecedented 43.8% over FY21. Imports grew 55.1% in FY22, reaching \$611.9bn. The current account deficit widened to a 13-quarter high of (-)2.7% of GDP in Q3 FY22 due to worsening merchandise trade deficit relative to GDP. FPIs registered outflows for a fifth consecutive months at (-) \$5.5bn while net FDI inflows were a buoyant \$4.3bn in February 2022. Global crude prices at \$112.4/bbl. in March 2022 was at its highest since April 2014. Global coal prices increased to a historic \$294.4/mt during the month.

However, in one of its reports, KPMG expects that the positive business environment, robust industrial output and rapid vaccination coverage have provided strong momentum for the growth of India's economy, with an estimated 9.2% GDP growth for the current financial year.

Various parameters such as GST collections, UPI transactions, FASTag revenues, demand for electricity, passenger and freight traffic via rail and air, and metal and coal production exhibited positive momentum, pointing toward continued economic recovery despite the new year commencing with concerns regarding the third wave of COVID-19 and the possible roadblocks that could arise. Agricultural resilience and lower unemployment add to the positive outlook for the economy. The improving economic situation, employment available and household income boosted the consumer-confidence index, whereas the overall improved business environment supported a rise in the business-confidence index.

The Union Budget 2022–23 presented in February 2022 focuses on infrastructure investments, with capex 35.4% higher than in the previous year's budget. The government's continued emphasis on capex is expected to further promote economic activity, support job creation and attract foreign and private investments. The government's projected fiscal deficit of 6.9% of GDP for FY22 is not only lower than the 9.2% of FY21 but also in line with the fiscal consolidation objective outlined by the finance minister the previous year to achieve a fiscal deficit below 4.5% by 2025–26.

While various macroeconomic parameters point toward the country's sustained growth, it is imperative that global developments, such as the geopolitical unrest in Ukraine, supply-chain disruptions and rising commodity prices, which can derail progress, are kept in mind.

The gradual opening up of the economy and removal of restrictions after the second wave of COVID-19 led to India's GVA rising 8.5% during the second quarter of FY22. Contact-intensive sectors such as trade, hotels, transport and communications grew 8.2% in Q2 FY22 aided by increase in vaccination rates. India's annual FDI inflow was \$81.97bn in FY21, the highest so far. The country's foreign exchange reserves also climbed to a record \$642bn in October 2021. The unemployment rate reduced sharply in January 2022 to the lowest so far in FY22.

Rubber Industry – Global & Indian Market

MARKET SIZE

India's performance in rubber sector impressive'

India's rubber consumption had increased 22% in 2021, and the use of both natural and synthetic rubber has increased. The global demand for rubber too had gone up in 2021, registering a growth of 11%.

The growth of the sector was supported by investments and regulatory measures taken by the government and the private sector. "The government introduced incentives and reforms to improve the business climate. The government's policy of self-sufficiency also played a crucial role in the growth of the sector.

The global rubber market size stood at US \$ 40.77 billion in 2019 and it is projected to reach US \$ 51.21 billion by 2027, exhibiting a CAGR of 5.3% during the forecast period. Properties such as heat and abrasion resistance make rubber a highly useful and valuable raw material in various end-use industries. It is mostly used in manufacturing products such as tyres, car tubes, adhesives, hoses, gaskets, and roll coverings. The rising demand from the automotive industry for tyre and non-tyre applications is one of the key rubber market trends. It is majorly used in the manufacturing of tyres due to its strong properties, such as tear resistance and toughness. It also works under low-temperature conditions. It is a perfect material for the manufacturing of tyres and hence, accounts for over 40% of the share in the overall tyre composition. Additionally, properties, such as weather resistance, insulation property, and flexibility increase the usage in industrial applications including transmission belts, elevators, and non-flat belts.

The COVID-19 pandemic has affected the market in the same manner as numerous disrupted industries across the globe. Silicone rubber is majorly used in the automotive industry for the manufacturing of tyres and several components. During this pandemic, several countries including China, India, Germany, Italy, Brazil, and Canada declared complete lockdown. This further led to the shutdown of production facilities, and raw material transportation. This epidemic has severely affected the supply chain of numerous manufacturing units. Since, both raw material supply and finished goods distribution is majorly affected, causing a massive drop in revenue. China is a major consumer of materials and an epicentre of coronavirus,

thus, inhibiting the development of the market. Restrictions over export and import of products such as tyres, general, and industrial goods acts as a factor for the decline of the market.

Rubber products find applications in various industries such as packaging, manufacturing, engineering, and construction. When combined with various polymers and chemicals, it provides sturdy outcomes in the production of products such as surgical supplies, respirators, pacemakers, etc. Some companies operating in the market are specialized in compounding rubber according to the specifications of customers to develop novel products. For instance, reinforced products such as drive belts, air brake diaphragms, and conveyors are built from calendered or coated rubber on a revolving or stationary drum. On the other hand, non-reinforced rubbers are formed and cured for the formation of a sponge. Hence, the development of novel products is expected to create immense growth opportunities for the market.

DRIVING FACTORS

Growing Demand from Various End-Use Industries to Drive Market Rubber is dominantly used as a raw material in the automotive end-use industry for the production of a wide variety of products, such as tyres, crap tubes, adhesives, hoses, pipes, gaskets, and roll coverings. The increasing demand for tyre and non-tyre automotive parts is expected to influence market growth. It is further used in various applications, such as footwear, industrial goods, construction, textiles, and other consumer products. The amalgamation of rubber in footwear gives protection from water, chemicals, electricity, impact, and low temperatures. It is also used in a variety of consumer products, such as protective covers, mats, and others. The rising usage in textiles and industrial goods is expected to act as a driving factor for the growth of the market.

RESTRAINING FACTORS

Availability of Alternatives with Better Performance Indicators is Impeding Product Adoption. The market is gaining impetus through the demand from industries such as automotive, consumer goods, and clothing & footwear, but it faces considerable competition from materials such as polymers & plastics, and vinyl. Polymers & plastics are generally inexpensive as they are produced in massive quantities across the globe. Moreover, polymers such as PET, PP, and ABS have better capabilities such as elasticity, rigidity, anti-slip, and durability, making them superior alternatives. Products such as pipes, seals, and tubes are preferably made of plastics and are significantly replacing rubber-based products in automotive and industrial applications. Vinyl or polyvinyl chloride (PVC) is another substitute material in products such as door and window siding, flooring, pipes, and industrial gloves. Hence, the availability of alternatives is expected to diminish the expansion of the market.

The market size in the Asia Pacific stood at US \$ 22.09 billion in 2019. Asia-Pacific is the largest producer as well as a consumer with Thailand being the largest producing country of natural rubber and China being the largest consumer. The Asia Pacific is expected to witness the highest growth in the market across the globe. Growth in the automotive and construction industries is a key driver of the market in this region. China, Japan, and India are the key countries contributing to the market growth in the region due to the rising tyre production and construction activities in these countries

North America is anticipated to remain a key region in the market during the forecast period owing to the rising demand in automotive and footwear applications. The market in North America is also driven by factors, such as rising application in chemical and textile industries, and advancements in technologies. Europe is projected to witness significant growth in the market. The increasing demand for tyres in the automotive industry would contribute to the growth of the market in the region. Additionally, the uses of non-tyre automotive and industrial applications are some of the other key factors driving the market growth in Europe. Latin America and the Middle East & Africa would showcase lower growth in the market value

compared to the other regions due to factors, namely, more dependency on the import of natural rubber, high cost of synthetic type, and less production of tyres.

DOMESTIC RUBBER INDUSTRY

India ranks fourth among the top rubber consumers in the world. It is the third largest producer and is the largest producer of reclaimed rubber. Spurred economic growth and higher import duty and anti-dumping duty on tyres have contributed to the growth of the Indian Rubber Industry in recent years. The consumption of natural rubber has increased from 11,12,210 tonnes in 2018 to 12,11,940 tonne in 2019. The imports also increased by 24% in 2019 and 70% of the imports were through duty-paid channel. As in the previous years, 81% of imports were in the form of block rubber. The major factors behind the import are the differences in prices between domestic sheet rubber and international block rubber and shortage of rubber in the domestic market. The production capacity in India is around 9,00,000 tonnes, of which around 75% is tapped. Out of the total area under rubber in India of around 8,822,000 ha, 6,14,500 ha is a mature yielding crop.

Traditional rubber-growing states comprising Kerala and Tamil Nadu account for 81% of production. Major non-traditional rubber growing regions are the North Eastern states of Tripura, Assam and Meghalaya, Odisha, Karnataka, Maharashtra and West Bengal.

HOW RUBBER INDUSTRY CAN BECOME ATMANIRBHAR

The inverted duty structure has been a key impediment to the growth of India's rubber industry. Shashi Kumar Singh, vice president of All India Rubber Industries Association (AIRIA) recently commented that "India should correct the customs duty for the sector. Rubber Industries use more than 50 raw materials and synthetic rubber of which many are not produced in India."

He further added that MSMEs and other rubber goods producers have little option but to rely on imported high-quality raw materials from foreign players since the quality of natural rubber produced in the nation is not "up to the mark". In addition, tyre manufacturers buy the bulk of locally produced high-quality supply leaving the MSMEs with no other options but to import.

The insufficient production and inefficient quality standards of the Natural Rubber (NR) are two of the most important stigmas that the nation's rubber raw material manufacturing segment have to deal with. Adding on that, the massive price hike and ongoing pandemic has vigorously struck the Synthetic Rubber (SR) market.

As of now, India's rubber industry is massively dependent on the import of raw material for its overall operations. As per the data shared by Vikram Makar, President, AIRIA "We are dependent on imports of many raw materials which are vital inputs for the rubber goods manufacturer, be it SBR and NBR (styrene-butadiene rubber and nitrile butadiene rubber) (40% needs to be imported), carbon black and general rubber chemicals (30% import) silicone rubber, EPDM polychloroprene (100% import)."

However, too much dependency on the international market for import of raw materials can be risky for the developmental imperatives of the country. Therefore, it is important that India has a dependable and captive source of raw material production in the country to ensure its seamless supply.

The key steps the Government, Rubber Board & industry must attend for a resilient and Atmanirbhar future.

Planting and Replanting

According to the National Rubber Policy, 2019, the country's Natural Rubber (NR) consumption by 2030 is expected to be over 2.00 million tonnes. However, in 2030, the local production will be able to cover 75% of the NR demand.

To bridge the gap between demand and supply by 2030 and beyond, a quick analysis shows that India should have a total area of at least 10 lakh hectare of yielding plantation with a productivity of 2 tonnes per hectare per year.

At least two lakh ha of the present mature holdings that are old and senile should be replanted immediately. By 2030 about two lakh ha of immature fields will additionally come into maturity. Additionally, another two lakh ha should be planted in the next six years to obtain 10 lakh ha of mature plantation in 2030. Area expansion should concentrate in North Eastern states, particularly in the state of Assam and also in parts of Karnataka and Maharashtra where land is available and productivity has the potential to go up compared to other non-traditional areas of the country, states a study titled A Road Map For Attaining Self-Reliance In Natural Rubber Production In India By 2030.

Shift from Sheet Rubber to Block Rubber

Today, Indian producers focus on producing sheet rubber since it guarantees a better farm gate price, while block rubber output in India is currently in small amounts (ranging from 15-20%), and additionally, it is processed from aged scrap. Whereas, in Southeast Asian and other natural rubber producing countries, the production of block rubber is around 80% and it is processed from new cup lumps to assure superior grades.

Owing to the consistency in properties and low cost of production, currently, the global focus is on block rubber. However, as the recent circumstances states, in India 80% of the block rubber imported, which according to the National Rubber policy, 2019 needs a shift in approaching rubber processing from predominantly sheet rubber and promoting block rubber in the country.

Role of NIRT and RRII

To fix the ongoing event, the role of National Institute for Rubber Training (NIRT) and Rubber Research Institute of India (RRII) is crucial and immense.

Over the past National Institute for Rubber Training (NIRT) formerly known as Rubber Training Institute (RTI), has taken crucial steps in collaboration with external bodies under Central and State Governments like massive launching of skill development programmes for the plantations sector in the natural rubber growing states under the PMKVY project, Union ministry of Skill Development and Entrepreneurship, employability enhancement programmes for students under ASAP project, and more.

However, the need of the hour is to initiate long-term academic programmes in plant science and rubber technology, such as degree, post-graduate diploma, and certificate courses, in collaboration with affiliated universities, to bring change management for cluster self-reliance empowerment through business development, promotion of value addition through internal programmes, and more.

Whereas, the RRII has to be more resilient in delivering advanced innovation to propel domestic production in India. In the present scenario, innovations like high yielding hybrid rubber clones needs to be spread across the country for a robust and Atmanirbhar future.

Latest World Rubber Industry Outlook now available from IRSG [August 10, 2021 RubberWorld](#) 1220 Views.

The Secretariat of the International Rubber Study Group (IRSG), an international body for improving the transparency of the world rubber market and strengthening the international cooperation on rubber issues, publishes comprehensive data on production, consumption, trade and prices, covering both natural rubber (NR) and synthetic rubber (SR). On a biannual basis, the World Rubber Industry Outlook (WRIO) presents the latest long-term forecasts for the next 10 years, covering the world economy as well as the vehicle, tyre and rubber sectors.

The global rubber demand declined by 6% in 2020, reaching 27.07 million tons; the contraction in 2020 is 1.1% smaller than IRSG's earlier projection because of strong recovery in the second half of 2020 in the advanced economies and China. The vaccine powered recovery in a few advanced economies amid high infection rates of the virus variant, low vaccination rate and more sluggish growth in developing countries are leading to a lopsided global recovery, which explains much of the upward revision in global outlook in 2021 under the base case scenario.

The global rubber demand in tyre sector is expected to recover by 7.2% in 2021 from a deeper contraction (-7.3%) experienced in 2020. A stronger recovery projected for non-tyre sector (7.6%) is driven by continuing surge in demand for rubber products in the global healthcare industry and stronger recovery of rubber products in the supply chain of mobility. The total rubber demand is forecast to rebound by 7.4% in 2021 and moderate to 4.7% in 2022 under the IMF scenario. The global NR demand contracted by 6.8% in 2020, reaching 12.71 million tons and projected to rebound by 7.1% in 2021, owing to sharp recovery expected in the CV segment in the mature and emerging markets.

The world SR demand declined by 5.3% reaching 14.36 million tons in 2020, and is forecast to recover by 7.6% in 2021, supported by stronger growth in the U.S., Europe and emerging Asia. World NR production declined by 5.1% in 2020, reaching 13 million tons. Tapping days lost due to risks associated with extreme weather, spread of leaf fall disease and labor shortage during the pandemic crisis disrupted production in major producing countries in Southeast Asia. As many natural rubber producing countries are badly affected by the virus variants, a lower rate of total planting likely has impact on the medium and longer term supply. Total NR production is forecast to rebound by 6.5% , reaching 13.86 million tons and exceeding the pre-pandemic 2019 level. NR production growth will moderate to 3.5% in 2022.

FUTURE OUTLOOK

Global Rubber Market to Reach USD 50 Billion by 2028 revealed by BlueWeave Consulting

Asia-Pacific region dominates the global rubber market owing to the leading products in countries including Thailand, China, India, etc. The flourishing manufacturing industry and increasing construction activities in these emerging economies such as China, Japan, South Korea, etc., are also fuelling the growth of the market. However, North America and Europe also cover a substantial portion of the global rubber market.

The global rubber market is growing on account of the expanding production of automobiles, increasing demand for tyres and other automotive parts along with increasing use of rubber in the production of non-industrial goods such as cooking spatulas, shower mats, etc.

A recent study conducted by the strategic consulting and market research firm, **BlueWeave Consulting**, revealed that the global rubber market was worth US \$ 36.5 billion in the year 2021 and is projected to surpass US \$ 50 billion by 2028. The **global rubber market** is flourishing at a high rate owing to the expanding production of automobiles, propelling demand for tyres and other automotive parts such as shock absorbers, protective pads, etc. Furthermore, the expanding use of rubber in the production of non-industrial goods such as cooking spatulas, shower mats, dishwashing gloves, etc. However, the negative impact of synthetic rubber on the environment may act as a huge restraining factor for the growth of the global rubber market growth.

Rising Demand for Medical Products is Propelling Global Rubber Market

The increasing prevalence of various acute and chronic diseases along with rising demand for surgical procedures and treatment is propelling the demand for medical devices and equipment and other products. Several of these medical products such as surgical gloves, tubes, stoppers, condoms, breathing bags, prosthetics, implants, catheters, etc., are made of rubber. The demand for surgical gloves registered a

IMPACT OF COVID-19 ON GLOBAL RUBBER MARKET

The unprecedented COVID-19 pandemic outbreak tremendously halted the growth of the global rubber market. This is mainly due to the disruptions in the manufacturing and supply chains of the end-user industries including tyres, automotive, footwear, industrial goods, etc. Furthermore, several countries including China, India, Brazil, etc., imposed a complete nationwide lockdown due to which production and processing of rubber were also hindered during this period. However, the demand for latex rubber registered significant growth owing to the spike in demand for medical products such as surgical gloves and PPE kits.

MANUFACTURING PROCESS OF RUBBER PROFILES

1st Stage (Raw Material Inspection)

The basic raw material is in powder & oil form which is inspected labeled and uniquely numbered. Any raw material found to be non-confirming then quality check manager will verify the same. The material is either accepted under deviation or rejected. Rejected coils are labeled with red rejection card to be returned to vendor. The approved material is then accepted by store and then is further issued for production as per requirement.

Carbon

Chalk Powder / Calcium Carbonate

Rubber Oil

Natural Rubber / Synthetic Rubber

2nd stage (Mixing in Kneader Machine)

The raw material has been mixed in Kneader mixture and compound is been formed. Now with help of Mixing Mill, Particular shaped rubber sheet is formed.

3rd stage (Heat treatment in Mixing Mill)

Rubber Sheet is heated at 125 degrees celcius. After 24 hours of cooling down, again this Rubber sheet is passed through mixing mill and cut in small strips.

4th stage (Extrusion)

Desired dyes has been covered on Extrusion Machine and Rubber Strips are passed through Extruder machine and Rubber Beadings are outcome from machine. Now these Rubber Beadings are kept in Electric/Diesel Steam Chamber for 1 hour at 60 degree celcius. After an hour, Rubber beading is taken out with help of Crane. Now material is passed through various chemicals for shining and smoothing of Profiles.

Final Stage (Quality Check & Dispatch)

Visual Inspection

In this process the material is 100% visually inspected for any visual defects like length defects, rusting, pitting, and radius, unpolished rubber, etc. which can be visually detected and removed by highly skilled and trained staff.

Final Inspection

The material visually inspected is checked for final quality parameters before dispatch.

Sorting

Here the material is sorted as per size or as per customer specifications. This is as per Customer requirement only.

Packing

Here the material is weighed as per size wise standard packaging standards and sealed and packed in a red colored box. It is labeled mentioning the size, manufacturing number, grade of the material, quantity. It is further packed in larger corrugated boxes for dispatch.

Dispatch

The packed material is then loaded on pallets and dispatched with necessary documents along with the material. The consignment is then sent either by road, rail, sea, or air as per the contract.

The Foreign Direct Investment

The Government of India, from time to time, has made policy pronouncements on Foreign Direct Investment (“FDI”) through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”), has issued consolidated FDI Policy Circular of 2017 (“FDI Policy 2017”), which with effect from August 28, 2017, consolidates and supersedes all previous press notes, press releases and clarifications on FDI Policy issued by the DIPP that were in force. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Policy 2017 will be valid until the DIPP Offers an updated circular.

The Reserve Bank of India (“RBI”) also Offers Master Circular on Foreign Investment in India every year. Presently, FDI in India is being governed by Master Circular on Foreign Investment dated July 01, 2015 as updated from time to time by RBI. In terms of the Master Circular, an Indian company may Offer fresh shares to people resident outside India (who is eligible to make investments in India, for which eligibility criteria are as prescribed). Such fresh Offer of shares shall be subject to inter-alia, the pricing guidelines prescribed under the Master Circular. The Indian company making such fresh Offer of shares would be subject to the reporting requirements, inter-alia with respect to consideration for Offer of shares and also subject to making certain filings including filing of Form FC-GPR.

Under the current FDI Policy of 2017, foreign direct investment in micro and small enterprises is subject to sectoral caps, entry routes and other sectoral regulations. At present 100 % foreign direct investment through automatic route is permitted in the sector in which our Company operates. Therefore, applicable foreign investment up to 100% is permitted in our company under automatic route.

Foreign Exchange Management Act, 1999 (“FEMA”) and Regulations framed thereunder

Foreign investment in India is governed primarily by the provisions of the FEMA which relates to regulation primarily by the RBI and the rules, regulations and notifications there under, and the policy prescribed by the Department of Industrial Policy and Promotion, Ministry of Commerce & Industry, Government of India. As laid down by the FEMA Regulations no prior consents and approvals are required from the Reserve Bank of India, for Foreign Direct Investment under the ‘automatic route’ within the specified sectoral caps. In respect of all industries not specified as FDI under the automatic route, and in respect of investment in excess of the specified sectoral limits under the automatic route, approval may be required from the FIPB and/or the RBI. The RBI, in exercise of its power under the FEMA, has notified the Foreign Exchange Management (Transfer or Issue of Security by a Person Resident Outside India) Regulations, 2000 (“FEMA Regulations”) to prohibit, restrict or regulate, transfer by or issue security to a person resident outside India and Foreign Exchange Management (Export of Goods and Services) Regulations, 2000 for regulation on exports of goods and services. 100 % FDI is permitted in under the automatic route in the IT sector.

Duty Drawback Scheme

The duty drawback scheme is an option available to exporters. Under this scheme, exporter of goods is allowed to take back refund of money to compensate him for excise duty paid on the inputs used in the products exported by him. It neutralizes the duty impact in the goods exported. Relief of customs and central excise duties suffered on the inputs used in the manufacture of export product is allowed to exporters. The admissible duty drawback

amount is paid to exporters by depositing it into their nominated bank account. Section 75 of the Customs Act, 1962 and Section 37 of the Central Excise Act, 1944, empower the Central Government to grant such duty drawback. Customs, Central Excise Duties and Service Tax Drawback Rules, 1995 (the “Drawback Rules”) have been framed outlining the procedure to be followed for the purpose of grant of duty drawback (for both kinds of duties suffered) by the customs authorities processing export documentation. Under duty drawback scheme, an exporter can opt for either all industry rate of duty drawback scheme or brand rate of duty drawback scheme.

The all-industry rate of duty drawback scheme essentially attempts to compensate exporters of various export commodities for average incidence of customs and central excise duties suffered on the inputs used in their manufacture. Brand rate of duty drawback is granted in terms of rules 6 and 7 of the Drawback Rules in cases where the export product does not have any all-industry rate or duty drawback rate, or where the all-industry rate duty drawback rate notified is considered by the exporter insufficient to compensate for the customs or central excise duties suffered on inputs used in the manufacture of export products. For goods having an all-industry rate, the brand rate facility to particular exporters is available only if it is established that the compensation by all industry rate is less than 80% of the actual duties suffered in the manufacture of the export goods.

Merchandise Exports from India Scheme

Pursuant to the Foreign Trade Policy (2015-2020), the Merchandise Exports from India Scheme (the “MEI Scheme”) was introduced to provide rewards to exporters to offset infrastructure inefficiencies and associated costs in export of goods, especially those having high export intensity, employment potential and ability to enhance India’s export competitiveness. Export of notified goods to notified markets are rewarded under the MEI Scheme. The basis for calculation of the reward under the MEI Scheme is on the Free on Board (“FOB”) value of exports realized in free foreign exchange or on the FOB value of exports mentioned in the shipping bill, whichever is less, unless otherwise specified. With effect from June 1, 2015, the MEI Scheme mandatorily requires a declaration of intent to be endorsed on the shipping bills (except free shipping bills) to be eligible to claim any reward under the MEI Scheme.

Ownership restrictions of FIIs

Under the portfolio investment scheme, the total holding of all FIIs together with their sub-accounts in an Indian company is subject to a cap of 24% of the paid-up capital of a company, which may be increased up to the percentage of sectoral cap on FDI in respect of the said company pursuant to a resolution of the board of directors of the company and the approval of the shareholders of the company by a special resolution in a general meeting. The total holding by each FII, or in case an FII is investing on behalf of its sub-account, each sub-account, should not exceed 10% of the total paid-up capital of a company.

State Laws

These include legislations relating to, among others, classification of fire prevention and safety measures and legislations dealing with license for sale of alcohol. Further, we require several approvals from local authorities such as municipal bodies. The approvals required may vary depending on the state and the local area.

Municipality Laws

Pursuant to the Constitution (Seventy-Fourth Amendment) Act, 1992, the respective state legislatures in India have power to endow the municipalities with power to implement schemes and perform functions in relation to matters listed in the Twelfth Schedule to the Constitution of India. The respective states of India have enacted laws empowering the municipalities to issue trade license for operating eating outlets and implementation of regulations relating to such license along with prescribing penalties for non-compliance.

Work-in-progress and finished goods include appropriate proportion of overheads and, where applicable, excise duty. Raw Material is valued at cost (First in First Out -FIFO basis).

3.6 Provisions and Contingencies

A provision is recognised when an enterprise has a present obligation as a result of past event and it is probable that an outflow of resources will be required to settle the obligation, in respect of which a reliable estimate can be made. Provisions are not discounted to its present value and are determined based on best estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet date and adjusted to reflect the current best estimates.

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements.

3.7 Intangible Assets

Goodwill is an asset representing the future economic benefits arising from other assets acquired in a business combination that are not individually identified and separately recognized. Goodwill is initially measured at cost, being the excess of the consideration transferred over the net identifiable assets acquired and liabilities assumed. Goodwill is considered to have indefinite useful life and hence is not subject to amortization but tested for impairment at least annually. After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination, is from the acquisition date, allocated to each of the Company's cash generating units (CGUs) that are expected to benefit from the combination. A CGU is the smallest identifiable group of assets that generates cash inflows that are largely independent of the cash inflows from other assets or group of assets. Each CGU or a combination of CGUs to which goodwill is so allocated represents the lowest level at which goodwill is monitored for internal management purpose and it is not larger than an operating segment of the Company. A CGU to which goodwill is allocated is tested for impairment annually, and whenever there is an indication that the CGU may be impaired, by comparing the carrying amount of the CGU, including the goodwill, with the recoverable amount of the CGU. If the recoverable amount of the CGU exceeds the carrying amount of the CGU, the CGU and the goodwill allocated to that CGU is regarded as not impaired. If the carrying amount of the CGU exceeds the recoverable amount of the CGU, the Company recognizes an impairment loss by first reducing the carrying amount of any goodwill allocated to the CGU and then to other assets of the CGU pro-rata based on the carrying amount of each asset in the CGU.

3.8 Property, Plant and Equipment

Property, Plant and Equipment are carried at cost less accumulated depreciation / amortisation and impairment losses, if any. Acquisition Cost comprises its purchase price net of any trade discounts and rebates, any import duties and other taxes (other than those subsequently recoverable from the tax authorities), any directly attributable expenditure on making the asset ready for its intended use, other incidental expenses and interest on borrowings attributable to acquisition of qualifying fixed assets up to the date the asset is ready for its intended use. Subsequent expenditure on fixed assets after its purchase / completion is capitalised only if such expenditure results in an increase in the future benefits from such asset beyond its previously assessed standard of performance.

Losses arising from the retirement of, and gains or losses arising from disposal of fixed assets which are arrived at cost are recognised in the Statement of Profit and Loss.

Depreciation has been provided in accordance with useful lives prescribed in the Companies Act, 2013 on Written Down Value method.

Depreciation on fixed assets has been provided on written down value method in accordance with the manner specified in Schedule II of the Companies Act, 2013.

3.9 Cash and Cash Equivalents

Cash comprises cash on hand and demand deposits with banks. Cash equivalents are short-term balances (with an original maturity of three months or less from the date of acquisition), highly liquid investments that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in value.

3.10 Cash Flow Statement

Cash flows are reported using the indirect method, whereby net profit before extraordinary items and tax is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

3.11 Taxes on Income

Current tax is the amount of tax payable on the taxable income for the year as determined in accordance with the applicable tax rates and the provisions of the Income Tax Act, 1961 and other applicable tax laws.

Deferred tax is recognised on timing differences, being the differences between the taxable income and the accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Deferred tax is measured using the tax rates and the tax laws enacted or substantively enacted as at the reporting date. Deferred tax liabilities are recognised for all timing differences. Deferred tax assets are recognised for timing differences of items other than unabsorbed depreciation and carry forward losses only to the extent that reasonable certainty exists that sufficient future taxable income will be available against which these can be realised. However, if there is unabsorbed depreciation and carry forward of losses and items relating to capital losses, deferred tax assets are recognised only if there is virtual certainty supported by convincing evidence that there will be sufficient future taxable income available to realise the assets. Deferred tax assets are reviewed at each balance sheet date for their realizability.

3.12 Earnings per Share

Basic earnings per share is computed by dividing the net profit / (loss) after tax by the weighted average number of equity shares outstanding during the year. Diluted earnings per share is computed by dividing the net profit / (loss) after tax as adjusted for dividend, interest and other charges to expense or income relating to the dilutive potential equity shares, by the weighted average number of equity shares considered for deriving basic earnings per share and the weighted average number of equity shares which could have been issued on the conversion of all dilutive potential equity shares. Potential equity shares are deemed to be dilutive only if their conversion to equity shares would decrease the net profit per share from continuing ordinary operations. Potential dilutive equity shares are deemed to be converted as at the beginning of the period, unless they have been issued at a later date. Dilutive potential equity shares are determined independently for each period presented. The number of shares and potentially dilutive equity shares are adjusted retrospectively for all periods presented in case of share splits.

Further, as per the SEBI circular SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019, the UPI Phase II has been extended until March 31, 2020. Further still, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount be continued till further notice. Under this phase, submission of the Application Form by a Retail Individual Investor through intermediaries to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public issue closure to listing would continue to be six working days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing is proposed to be reduced to three working days.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism.
